

## **Studies on the Natural Products from the Soft Coral *Cladiella krempfi***

研究生：李媽寧 指導教授：許志宏

Three new compounds (1—3), with two of them are eunicellin-based diterpenes (2,3), along with three known compounds (4—6) have been isolated from the soft coral *Cladiella krempfi*, which was collected from Penghu Island of Taiwan. Their structures were determined through extensive spectroscopic data ( $^1\text{H}$  NMR,  $^{13}\text{C}$  NMR, HSQC, HMBC, and NOESY).
